

Vacancy - Supply Chain Manager

Join us in creating the most innovative underwater robotic technology for the harshest environments in the deepest oceans and most turbulent waters.

We lead the world with the most advanced engineering, electronics and software systems for pioneering electric underwater technology.

We don't just create products – we are revolutionising the underwater world!
So come and be part of an innovative and agile team that is dedicated to smart and inspired technology that is rapidly changing the future of underwater robotics.

In this role you will have overall responsibility for supply chain strategy and the management and delivery of strategic purchasing activities.

Main Responsibilities:

- To establish and develop relationships and contracts with key suppliers to ensure the company's business plan is met.
- To actively manage supply chain performance and risk.
- To continuously work with existing and new suppliers to meet company objectives including improvements to: - cash flow, lead times, obsolescence management and warranty term, whilst achieving cost reduction and quality targets.
- To negotiate and maintain purchase contracts with suppliers and to ensure contract terms are appropriately communicated within our organisation.
- To actively manage the RFQ process, specifications and documentation for new product development.
- To ensure all supply chain audits and obsolescence processes are developed and followed.
- To support the supplier selection and management of subcontract engineering development work packages.
- To work with a plan, do, check, act methodology to deliver continuous improvement.
- To develop and present supply chain KPIs to demonstrate performance and continuous improvement.
- To ensure that the companies supply chain activities are always and without exception in line with our code of conduct.

The role is based full-time on site at our Fareham premises, attracts a full benefits package and competitive salary.
