

Integration Technician

Join us in creating the most innovative underwater robotic technology for the harshest environments in the deepest oceans and most turbulent waters.

We lead the world with the most advanced engineering, electronics and software systems for pioneering electric underwater technology.

We don't just create products – we are revolutionising the underwater world!
So come and be part of an innovative and agile team that is dedicated to smart and inspired technology that is rapidly changing the future of underwater robotics.

Main Responsibilities

- Integrate all assemblies and sub-assemblies to produce complete systems as per the customer specification and in accordance with company documentation.
- Conduct all testing required, proving system functionality, including all auxiliaries as per customer requirements.
- Provide offsite/offshore commissioning and customer support as and when required by the company or by customer.
- Fault find and repair equipment as situations dictate and ensure that all faults and issues are reported in the appropriate format.
- Raise change requests and provide information to improve product quality or improve efficiency to support continual improvement process.
- Interpreting designs, engineering information and electrical drawings to assemble and test working assemblies and proto-types.
- Good knowledge in the use of fibre optic termination, equipment and testing.
- Appropriate use of all relevant IT and other systems required to perform the role.
- Using personal judgement and initiative to develop effective and constructive solutions to challenges and obstacles in day to day activities and procedures within the specified role.
- Complying with 6S best practice and health and safety policies to maintain a safe working environment.
- To act ethically, with integrity and in the best interest of the business at all times.
- To maintain a professional and supportive relationship with other departments in order to deliver business and delivery objectives or deadlines.

The role is based full-time on site at our Fareham premises, attracts a full benefit package and competitive salary.
